

Dedicated to Improving Our Services...

**Spectrum Home Health Care
is a participant in the
Home Health Quality Improvement
National Campaign**

Spectrum Home Health Care is proud to be a participant in the 2007 Home Health Quality Improvement (HHQI) National Campaign. This campaign seeks to unite the health care community under the shared vision of reducing avoidable hospitalizations to improve patient quality of care.

Home health patients prefer to stay home whenever possible. Hospitalizations can unnecessarily create financial and emotional burdens for patients and their families, and can negatively impact the health care delivery system. Currently, more than one in four home health patient episodes will result in a hospitalization. Home health quality improvement interventions can be effective in reducing avoidable hospitalizations.

Spectrum Home Health Care is dedicated to improving our services for the well-being of our clients and for the professionals who put their trust in our agency to provide quality home care services.

If you have any questions or would like to know more about this campaign please contact our Performance Improvement Coordinator or to make a referral, contact our Intake Nurse at 567-4600.
